

HELP OUR WOODS

Walcott Woods Cleanup

NOVEMBER 7, 2015 10am-noon

rain date: Sunday, November 8th

Meet at the entrance between 25 and 27 Lewis Street

Join the Maynard Conservation Commission, The Maynard Litter League, MaynardCAN! and our neighbors to clean up Walcott Woods, our neighborhood woodland.

We will provide gloves, tools, and trash bags. Learn about our native plants and animals! There will be copies of the Walcott Woods botanical survey conducted by New England Wild Flower Society available to read.

Join your neighbors and community organizations in cleaning up Walcott Woods, Maynard's local Habitat Restoration project.

Wear insect repellent and long pants because there is poison ivy in the area!

Remember: Walcott Woods belongs to all of us. Don't dump trash, yard waste, pesticides, or herbicides in the woods.

This restoration project is funded by a grant from CISMA and the River Stewardship Council.

Bittersweet: pretty plant, or weedy invasive? And why are there so many wild turkeys around?
